

Empower your company.

Support your people.

Achieve your goals.

BCI's Workday Specialty Practice is focused on enhancing the benefit administration and employee engagement experience of Workday. This includes integrating voluntary benefits such as Life with Long Term Care into the Workday ecosystem.

With our integration we also manage the individual level billing changes with the carrier and provide accurate data back to Workday, providing both HR and employees one system with a total view of all benefits.

Our ElectConnect platform integrates with your Workday platform:

Problem:

Whole Life can be a challenge to administer on Workday and benefit administration platforms. This fast growing product requires a deep level of individual consumer education.

Solution:

BCI's *prebuilt custom integration* provides a seamless data integration and enrollment process. Our proven four step process for implementation only requires 6-8 weeks and requires no employer IT resources.

Approach:

Our proprietary SaaS ElectConnect integrates with your existing Workday platform to solve any product complexity challenges. We will Educate, Enroll and Administer any carrier's Life with LTC product.

Outcome:

ElectConnect handles all aspects of enrollment and ongoing administration. Our platform includes decision support tools, videos and customizable educational content. Auto load existing amounts, stack coverage to preserve participation.
