## Our ElectBenefits platform integrates with your existing HRIS platform:

### **Enrollment**

Our proprietary SaaS *ElectBenefits* integrates with your existing platform to solve any product complexity challenges. We will Educate, Enroll and Administer.

### **Integration**

BCI's *prebuilt custom integration* provides a seamless data integration and enrollment process. Our proven four step process for implementation only requires 6-8 weeks and requires no employer IT resources.

### **Call Center**

Our licensed counselors have 20+ years of experience enrolling VB products. Enrollment can be supported with inbound/outbound calls, Zoom enrollment and on-site support.

### **Advanced Technology**

*ElectBenefits* handles all aspects of enrollment and ongoing administration. Our platform includes decision support tools, videos and customizable educational content. Auto load existing amounts, stack coverage to preserve participation.

## Conforming your strategy to your platform, instead of the other way around?

BCI's *ElectBenefits* platform will make that a thing of the past. Our platform integrates with your existing HRIS platform to educate employees on their available coverage options while seamlessly enrolling and administering the benefits.

## Life with Long Term Care

Life with Long Term Care Insurance is today's fastest growing voluntary benefit. However, leading HCM's cannot support it. BCI has a proven solution that enhances the experience with no employer IT resources required.

## Concerned with data integrity or individual level billing?

With our integration we manage the individual level billing changes with the carrier and provide accurate data back to your platform, providing employees one system with a total view of all benefits in their Worker profile.
